

MACLEOD DISTRICT L. N. water and made to pay the rates demanded, many have found the burden unbearable, and as a result their land is being confiscated because of non-payment of rates.

The commission, headed by Prof. M. L. Wilson, head of department of agricultural economics, Montana State College, Bozeman, and composed of Dr. W. H. Fairfield, and L. C. Charlesworth, chairman of the Alberta Irrigation Council, opened the series of meetings which will be held, three further gatherings being scheduled to take place at Turin, Picture Butte, and Coalhurst. It is the desire of the Provincial Government to institute a searching inquiry to gather information bearing on the status and condition of the project and the ability of the settlers on the land, and second, if the existing rate schedule cannot be met on the basis of possible production, the suggestion of a fair and equitable rate.

Macleod Area Wants Out

W. Williamson, who acted as the spokesman on behalf of the

Hollandale School, July 24.—Testifying on Wednesday afternoon before the special fact-finding commission appointed by the Alberta Government to investigate conditions on the Lethbridge Northern Irrigation project, some 35 farmers of the Macleod unit, west-end section of the project, painted a graphic word picture of the state the farming industry had fallen into since the introduction of irrigation into that section. The bone of contention in this area is laid to the fact that farmers in the main areas were included in the project through no acquiescence of their own, and, since they were forced to take the

farmers, stated at the outset that the resolution drawn up and presented to the Government in the spring regarding the exclusion of the Macleod unit, should be given priority over the question of rates, for he was of the opinion, and he voiced the sentiments of the whole assemblage, that the Macleod end of the project was other units insofar as townships 9-25 and 9-26 had been forced to accept the irrigation or lose their lands. Considerable discussion arose on this point, as the commission did not think that dealing with this matter came within its jurisdiction. The matter was finally left in the hands of W. H. Shield, M.L.A., when the resolution it be handed over to the commission to be dealt with. The commission informed the farmers present that any further information or data regarding this exclusion matter should be sent in to the secretary of the Waterusers' association, and every consideration would be given it if the Government granted the commission the power to look into the matter.

The Resolution

The resolution bearing on the exclusion clause and also mentioning the different factors having a direct bearing on the Macleod unit as compared with other sections, was read and is as follows:

"Pursuant to the Government's policy of reclassification of L. N. lands, the undersigned ratepayers residing in the Macleod unit, L.N.I.D. take this opportunity of presenting to the Government the following resolution:

"Whereas, prevailing weather conditions in the Macleod unit, L.N.I.D., taken over a period of 25 years in the past do not admit of any profitable application of water except in two or three odd years.

"And, whereas, it has been proven by actual experience in irrigation farming by ratepayers residing in the Macleod unit, L.N.I.D., who have conscientiously undertaken to apply water to their lands that irrigation is not only a too costly undertaking at any price, but has also proven to be in certain cases harmful to growing crops and harmful to the land as well.

"And, whereas, this serious condition of affairs is in part attributable to climatic conditions, adverse to irrigation, and in part to the peculiar nature of the soil lacking the necessary qualities to insure success such as both surface and particularly sub-soil drainage, topography, etc., constituting conditions altogether beyond the control of man:

"Furthermore: "Whereas the ratepayers in the Macleod unit to a great extent were misled as to the real issues involved when application for admittance into L.N.I.D. was made, for instance, when a farmer applied for 10 or 25 acres as the case may be, without his consent, under

the law was forced to take 10, 20 and even 40 times the area applied for, as can be proved by actual facts existing.

"And, whereas, the ratepayers of the Macleod unit were only informally notified through an advertisement in one daily newspaper, which unfortunately, they did not all read (and not by registered mail as all important matters should be) as to their privilege of withdrawal from the L. N. I. D., as was followed under the provisions of the Act.

"And, whereas, when they were finally brought face to face with the facts as they actually came into existence, a substantial number of the ratepayers of Macleod unit voted against bonding their lands.

"Be it resolved: "That, we, the undersigned ratepayers of the Macleod unit, humbly petition and pray the Government to classify as non-irrigable, the following lands:

"(a) All of Tp. 10-25 because of its vote against irrigation, or (if this cannot be done under the circumstances) then those lands in Tp. 10-25 as listed below by the petitioners.

"(b) The parcels of land in townships 2-25 and 2-26 as listed below.

Farmers Give Evidence

The remaining time of the sitting was given over to the hearing of evidence from the various farmers present, who gave their personal reasons why they were unable to meet the rates demanded.

I desire to thank all those who voted for me in the election on the 28th instant. The support I received from all parts of the Constituency was extremely gratifying. Many Liberals and U. F. A., joined with our Conservative friends in voting for me and to one and all I extend my very warmest appreciation. Throughout the contest I experienced nothing but kindness and courtesy from friends and opponents alike.

JOSEPH D. MATHESON,
Macleod, Alberta, July 29th 1930.

CUT LABOUR COSTS

The Division of Field Husbandry of the Dominion Department of Agriculture advocates the use of tractors and other equipment wherever possible to reduce the cost of farm labour. Good results may be obtained through the use of large horse hook-ups as well as through the use of tractor equipment.

In the estate of GEORGE PHILIP ROWE, LATE OF "CRINVEN" IN THE PROVINCE OF ALBERTA, FARMER, DECEASED.

Notice is hereby given that all persons having claims upon the estate of the above named George Philip Rowe, who died on the 23rd day of March, A. D. 1930, are required to file with the undersigned collector or administrators, by the 15th day of August, A. D. 1930, a full statement duly verified of their claims and of any securities held by them, and that after said date the administrators will distribute the assets of the deceased among the parties entitled thereto having regard only to the claims of which notice has been so filed or which have been brought to their knowledge.

Dated this 12th day of July, A. D. 1930.

Mrs. George P. Rowe,
Administratrix,
Macleod, Alberta.
John L. Fawcett,
Solicitor for Administratrix,
Macleod, Alberta.

KING GOVERNMENT DEFEATED — CONSERVATIVES SWEEP TO VICTORY WITH BIG MAJORITY OVER ALL — FOUR CABINET MINISTERS DEFEATED — BIG TORY GAINS IN QUEBEC

Toronto, Ont., July 29.—Canadian Press reports the election of 240 members out of 245, distributed by parties as follows:

Conservatives 136
Liberals 85
U. F. A. 9
Progressive 2
Labor 3
Liberal-Progressive 2
Independents and others 3

The Conservative party appears to have made a clean sweep, the most notable feature of their victory being the gain of 17 seats in the province of Quebec, which has been a Liberal stronghold since the general election of 1917.

The latest report gives the Liberals 39 seats in Quebec, the Conservatives 24.

Tories Make Maritime Gains

In the Maritime provinces, where the Liberals had expected to make gains, they lost heavily in P. E. I. and New Brunswick, and were only able to hold the three seats in Nova Scotia, the number they had at the time of dissolution. In New Brunswick, Hon. P. J. Veniot, postmaster general, was the only Liberal elected. Hon. Cyrus McMillan, who was recently appointed minister of fisheries, was defeated in Prince Edward Island.

Coming west to Ontario, where the Liberals gained a few seats, they lost many more to the Conservative drive to victory. The two notable victories were those of W. H. Moore who resigned as chairman of the tariff board to contest the election of Ontario South, and Sam Factor, who gained the distinction of administering to Tommy Church his first defeat in a long career, in municipal and federal politics, the first time in over 30 years that a Liberal has been elected in a Toronto constituency.

Conservative Sweep in West

The Conservative sweep continued on into the prairie provinces, adding nearly a dozen seats to the single one they held in the old House. The only bright spot in the whole Dominion seemed to be in British Columbia where all the Vancouver seats appear at this hour to have elected three Liberals and one Labor. Westminster appeared to be swinging into the Liberal column also, but the only seats the Liberals fought for, held in the province, East Kootenay, was lost to the Conservatives.

Four cabinet ministers were defeated—Hon. Cyrus McMillan, minister of fisheries; Hon. W. P. Kay, minister without portfolio; Hon. C. A. Cochrane, minister of railways and canals; Hon. C. A. Dunning, minister of finance. One of the new additions to the cabinet, Hon. Ian MacKenzie, defeated a prospective cabinet minister, Hon. H. H. Stevens in Vancouver Centre.

The Conservative gains have been divided almost equally between the three provinces. Four of the new seats were annexed in Manitoba—two from Liberals, one from Progressives, one from Liberal-Progressives. Liberals were forced to hold three seats in Saskatchewan to the Conservative attack. Three gains in Al-

berta were taken one from Liberals, one from Labor, and one from the United Farmers of Alberta.

Bennett Will Have Clear Majority

Hon. Robert Rogers succeeded in capturing South Winnipeg by a majority of around 300 after having been defeated there in 1926. While no definite returns have been received from Southeast Grey it is believed that Miss Agnes MacPhail, the only woman member, has succeeded in retaining the seat.

In Alberta Hon. R. B. Bennett, Conservative leader, had a huge majority in West Calgary, his lead over his young Liberal opponent being in the neighborhood of 7,000. Hon. Charles Stewart, minister of the interior, was trailing behind in West Edmonton until the country polls commenced to report, and gradually gained on his opponent and it is claimed that he has been elected by a majority under 100.

Gen. A. D. McRae, the chief Conservative organizer, was lost in North Vancouver according to the latest reports with quite a number of polls still to be heard from.

G. G. Coote's majority over J. D. Matheson, K. C., was 745 with one poll of 20 voters to hear from.

J. D. Matheson's majority in the town of Macleod was 365. G. G. Coote's majority in the 1926 election was 3373.

NEW USE FOR WHEAT

With the present uncertainty which prevails in the wheat market the Dominion Department of Agriculture finds that farmers are paying more attention to the marketing of grain crops through live stock.

Some important and interesting results have come to light, and not the least interesting is the experience of an Alberta farmer who had a light crop of wheat and started feeding the wheat to his stock in the form of eggs through the local egg pool. When the winter was over he figured up his costs and found that he had sold the wheat thus fed at an average price of \$5 per bushel.

Another western farmer with a modest flock of 150 birds kept his family throughout the winter on the income from the eggs, and he states that his gross income for the winter from the flock averaged \$200 per month.

Spring Point News

Mrs. Jackman and daughters Doris and Neva spent a week out on the Ranch.

Miss Jean Day is spending a few days on the Cox Ranch.

Mrs. Crisp from Union College Vancouver, held a church service at the School House on Sunday there was a large attendance and he gave a Discourse, Rev. J. L. Wright gave the final service of Benediction.

Mrs. Wood was a week-end visitor to the Hunter Branch Ranch.

The H. H. and L. H. after the recent rains and snow are busy harrow.

JOSEPH SCHILDKRAUT AS A ROMANTIC RASCAL IS EXCELLENT IN "THE MISSISSIPPI GAMBLER"

—MON.—TUES.—WED.—

All the world loves a romantic rascal, especially if he turns out to be more romantic than he first appears. Such is the case with Joseph Schildkraut as the star of "The Mississippi Gambler," his latest Universal all-talking feature now being shown at the Empress Theatre.

"The Mississippi Gambler," Schildkraut's first appearance on the talking screen since the immortal "Show Boat," was especially written for the star to afford him every possible opportunity for the romantic lure which he displayed so markedly in the previous super production. The story virtually revolves around the glamorous characterization. It is packed with dramatic action because of the colorful period in which it is set.

Beautiful Joan Bennett plays the leading feminine role, and the unique, crashing climax of the story gives her the best conceivable opportunity to display the remarkable ability which critics have been astounded to discover in a girl of eighteen.

Schildkraut's dark, classic handsomeness and Miss Bennett's blonde loveliness, to graphic effects by Gilbert Warrenton, make their love scenes together possibly more appealing than anything hitherto brought to the screen.

An outstanding cast, including Carmelita Geraghty, Alec B. Francis, Otis Harlan, Billy Welsh and others support Schildkraut and Miss Bennett under the direction of Reginald Barker.

THE SALVATION ARMY

Meetings as follows: Saturday—Prayer Meeting 8:30 p. m. Sunday—11 a. m. Holiness; 3 p. m.—Sunday School and Adult Bible Class; 7:30 p. m.—Salvation Meeting.

Officers in charge Capt. and Mrs. Weir.

SIXTH FORM SOCIETY REPORT.

Rains have been general throughout the Province during the past fortnight and have created a more optimistic outlook particularly in the southern area where hot dry weather has caused damage to dry land crops. On summerfallow and on irrigated land in the south crops are good; those on spring prepared land will be light.

In the central eastern part of the Province fields which escaped serious damage from blowing and cut worms are making excellent progress. In many fields the stand is thin and patchy and reseeded grain is late. There is, however, assurance of ample feed for livestock.

Along the eastern half of the main line of the C. N. R. crops are good. North of this line west of the C. P. R. from Edmonton to Calgary and in the Peace River district excellent conditions prevail. Plenty of warm weather to hasten maturity is all that is required. Grains in this area will mature about seven days later than last year, while south of Calgary harvest will probably commence slightly in advance of the usual season.

Oats and barley are growing rapidly and many heavy stands are seen. About 50% of oats are headed and practically all of the barley.

Hail has been reported at a number of points, but does not exceed the average.

Haying is in progress. Alfalfa is making a very good second growth. Pastures are in good condition. Sugar beets are doing well.

FIND POULTRY PAY

The importance of live stock in the establishment of a sound agriculture has long been recognized, and many farm families in Western Canada are beginning to realize the lesson already learned in the East, that live stock is too important a farm adjunct to be overlooked. They are also beginning to realize the important part poultry plays in the general scheme of farm revenues.

F. C. Elford, Dominion Poultry Husbandman, a trip through the West reports that many farmers are increasing their poultry flocks this year, and that the demand for certified hatchery chicks has assumed unequalled proportions. Following the drought of last year and the most complete crop failure in many sections, hundreds of farm families frankly admit that had it not been for the poultry they would not have been able to pull through.

You can tell the great at a resort. Only a great man should like that would have the courage to wear a bathing suit.

The only home now is that the sun will melt the snow. The wheat in wall boards is tooth paste.

South Macleod News

The Standoff W. L. held their first picnic at the most inviting spot on the river bank at Mrs. M. Whipples ranch. The afternoon was perfect and the members with their husbands and families numbering about eighty in all spent a most enjoyable time. The sports consisted of races from the Old Man's race down to the "wee tots" all partaking with much enthusiasm as there were many novelty and relay races introduced which afforded much amusement for the on-lookers.

The 1st and 2nd winners were rewarded in each group of races. At 6 o'clock the camp fire was kindled and while the coffee was percolating the ladies were busily engaged spreading the snowy white table cloths on the green grass, all-talking feature now being shown at the Empress Theatre.

MACLEOD ELKS' CARNIVAL A GREAT SUCCESS

—CARDSTON MAN WINS \$250 GOVERNMENT BOND—OTHER WINNERS

The "Hello Bills" of the Macleod Elk lodge, brought their four-day carnival to a close on Saturday night, when a very large crowd thronged the midway and from all appearances the "Bills" were doing a roaring business.

Fortunately or unfortunately rain stopped the previous Saturday, but it is believed that the rain helped the carnival, as a very much larger number of people were present on Saturday than would have been a week ago if it had been dry, as the rain put a different complexion on everything, and the people came out and spent their money more freely, as the crop prospects looked very much brighter than a week ago.

On the whole the carnival has been quite a success financially, although not so successful as previous carnivals, but the Bills did not expect the returns to be as good, on account of conditions generally.

The big excitement at the closing of the carnival was the drawing for the grand prize which this year was a \$250 government bond.

Tickets have been on sale for months for this prize and for the three cash prizes each night. The ticket stubs were used for the grand prize and the tickets put in the box at the entrance each night were used for the cash prizes.

Little Ruby Stackton mounted the platform and drew the winning ticket for the grand prize, and J. E. Steed of Cardston, was the lucky winner of the bond. The first cash prize drawn was for \$30 and the lucky ticket was in the name of Wm. D. Wood.

The second prize of \$20 went to Mr. Marsh of Granum, and the third prize of \$12.50 was drawn for I. Tolley of Orion. The goods offered as prizes on all the stands were of a high order of quality and the Elks are to be congratulated on the manner in which they conducted the carnival and in providing such handsome prizes.

STRAWBERRY GRADE

The Fruit Branch of the Dominion Department of Agriculture has recommended a grade for strawberries for 1930 as follows:

No. 1 shall consist of strawberries with the cap (calyx) and a short stem attached, which are well formed, of good colour, firm but not over-ripe, free from surface moisture, bruises, bird pecks, mould and from damage caused by sand, insects or other means.

The minimum diameter shall be five-eighths inch, measured from side to side.

In order to allow for variations incident to careful commercial grading and handling, five per cent by volume of the berries in any lot may be under the prescribed size and, in addition, five per cent by volume of the berries in such lot may be below the remaining requirements of this grade.

CARD OF THANKS

I wish to thank all those who supported me at the race on July 28th and particularly those who came so faithfully to ensure my re-election—G. G. Coote.

THE VOICE OF THE FLAME

When sober scientists undertake to put on a show, they can usually stage something that makes ordinary vaudeville wonders look simple.

A group of the General Electric Company's engineers the other day set up a radio device to make light waves audible, just for the edification of the convention of the American Society of Civil Engineers.

First one of the engineers held a lighted match in front of a photo-electric cell. A dull rumbling, like thunder came from an attached loudspeaker. Then a Neon lamp was passed before the cell. A steady hum proceeded from the loudspeaker. Following this an ordinary incandescent bulb was put in front of the "mouth piece" and a roar that almost shook the building was forthcoming.

There were other tricks of a

similar order. A specially-made German lamp produced a noise like the siren of a fire engine. A Swiss lamp made a noise like a hoot owl. A battery lamp gave out sounds like the thumping of a bass drum. And so on, through marvel after marvel.

Now all of this, on the surface, may not look like magic; but it is just a reminder of the fact that scientists have uncovered a whole universe of profound mysteries, lying hidden all about us. Listening to the queer noises made by light waves is a miraculous act, when you stop to think about it. The medieval alchemist, hunting for the elixir of life, was never on the trail of anything half so thrilling.

Tennyson, observing a common flower blooming in a chink in a stone wall, remarked that if he could but fully understand that bit of vegetable growth, from beginning to end, he "would know what God and man is." The modern scientist is in the same position. If one could fully understand this business of light waves that produce thunder, drum beats and siren wails, one would have a clearer picture of the universe than any mortal that ever lived.

All of which is just another way of saying that the earth is compacted of profound mysteries. The scientists are poking into these mysteries bravely, but each one when solved merely uncovers a new one beyond it. They discover just enough to demonstrate that we live in a world of wonder.

And that, perhaps, is their chief service to us. Who can be cocksure, in a world where the

finest flame can speak with a voice like thunder?

THE MIND OF THE CENSOR

Somebody with an inquiring turn of mind recently clipped editorials on censorship from many newspapers.

Hardly one newspaper favored censorship of the movies; all were against government regulation of film plays.

The main reason was this: It is impossible to discover a small group of people with such transcendent intelligence that will enable it to decide what is the right sort of entertainment for 10,000,000 Canadian people. The greatest weakness of all censorship lies in the fact that no one is competent to decide what is "good" or "bad" for people.

We have no quarrel with the censor type of mind—only we don't want it regulating our amusements for us.

THE DESTINATION IS IMPORTANT

New excavations have convinced a scientist that "the cradle of the human race" was in Central Africa. Other "cradles" have been discovered in China and India. And there was, of course, the Garden of Eden.

Just where human life started on the globe is interesting, but not important. What is important is whether human life is going to survive and grow; or whether it is merely a passing phase, like the mammoths and other strange creatures that turned out to be mistakes.

Practically every other living thing adapts itself to its world. Man tries to adapt the world to himself and his curious needs—or what he thinks are his needs.

It's a good trick—if he can do it.

CANADIAN GARDEN SERVICE, 1930

Flower Work

If one wants a continual supply of flowers and a trim appearance in the garden generally, all fading bloom and any suggestion of seed should be removed. The production of seed saps the vitality of any plant and it will not produce flowers and seed too. Alyssum and similar plants which produce a profusion of short-stemmed bloom may be snipped with a pair of shears when the flowers start giving place to seed, and they will send up a fresh supply of growth in about a week. After each rainfall, one must remember to loosen up the soil to conserve the moisture and let the air in. Just before the gladiolus start to bloom, it is advisable to sprinkle a little lime around the plants. This will give more depth of color to the flowers and will also sweeten the soil. Dying rose blooms, and bloom on the spirea, syringa, and other shrubs should be cut off so that all nourishment will go into the plants and produce growth for next year's flowering. It is now time to ease up on cultivation around fruit trees, shrubbery and woody vines as growth on these must be hardened so that it will not kill back next winter. It is a good plan to transplant a few well-grown annual flowers around the rose bushes and shrubbery to check the growth while a cover crop of oats or vetch, or even weeds may be used for the same purpose among the fruit trees and bushes.

Thinning

Too often the mistake is made of not thinning all the vegetables. Many people think that because they can use very small beets and carrots it is not necessary to give them any room, but beets will not develop even to the greens stage unless evenly spaced. It is only necessary to give an inch and a half each way, and a little less for carrots. As a result of this light thinning, the vegetables will grow quickly, and quickly grown vegetables are always the most tender. It is not too late yet to sow a few beets, beans, and possibly corn, but the seed should be soaked overnight to hasten germination and growth must be hurried by frequent cultivation and plenty of water.

Will Bloom Again

Most perennials can be made to bloom again if the first set of flowers are removed when about two-thirds of them are past their best. In doing this, it is important, particularly with the delphinium or perennial harkspur, to cut back all growth supporting the bloom. This may mean the removal of all stocks, but one usually finds when the first blossom of the season is nearing its end that second growth is well started from the bottom. With the phlox, remove the old bloom with a pair of shears, the removal of the stocks not being necessary. Columbine is usually cut right down, leaving only the second growth which comes up from the roots. After this pruning, it is well to dress the soil about the plants with some good fertilizer and to cultivate well.

Enemies of Fruit

Two pests are liable to be particularly active among the bush fruits just now. Currants, especially those of the red variety, are often almost defoliated in some quarters by the currant worm. To control spray with one ounce of hellebore to a gallon of water, adding a little soap to the water will help make the solution stick. If one has not a sprayer,

dust the hellebore on in powder form while the dew is on the plant, or after a light watering. This poison which must be fresh will also control the worms which eat the leaves of roses. Examine the raspberry bushes and if the tips of the new canes are wilting, one can be quite sure that cane-borers are at work. These grubs make rings around the tip of the cane and bore down inside. Cut off the tip well below the lowest ring and burn these cut off portions.

HEALTH SERVICE OF THE CANADIAN MEDICAL ASSOCIATION—HEART DISEASE

One of the reasons which makes heart disease difficult to deal with is that, unlike tuberculosis, it is not one definite condition. In the fight against tuberculosis, we have been able to give definite instructions, and by listening to our constant repetition of such instructions, most persons have grasped the idea of how the disease may be prevented.

Heart disease is not one disease. There are many abnormal conditions of the heart due to different causes, which give rise to different symptoms and require different methods of treatment and prevention.

When some part of the heart is damaged, we say that there is organic heart disease. The significance of the condition depends upon what part of the heart is damaged, how extensive the damage is, and whether or not the condition is progressive. These and other

similar points determine the gravity of the condition and indicate the proper form of treatment.

Some hearts are improperly formed from birth. The vast majority of hearts that are damaged have suffered injury because of the occurrence of some disease. Diseases of the body, due to the action of disease germs which give off poisons, are very often the cause of damaged hearts. Rheumatism in children is serious because of the fact that it often involves the heart.

Focal infections, such as diseased teeth or tonsils, are centres where germs persist for long periods of time, and are frequently responsible for damage to the heart.

The heart responds to every effort of the body and, within limit, it does so with ease and comfort. When the heart is subjected to strain by improper living or by overexertion, there is always the possibility of permanent damage resulting.

The prevention of heart disease begins with the building up of a sound body through attention to a proper hygienic mode of living. Proper care during an attack of disease, and particularly during the convalescence from a communicable disease, is essential. The removal of any focus of infection should not be delayed.

If a heart condition does develop, the life of the individual must be adjusted to the capacity of the heart. This does not mean that the person becomes an invalid; it does mean that he must learn his

limitations and live accordingly. It never pays to abuse the healthy body, and it is fatal to abuse a damaged organ.

Questions concerning Health, addressed to the Canadian Medical Association, 184 College St., Toronto, will be answered personally by letter.

A MILLION MATCHES

The Forest Service of Canada have been preaching the doctrine of fire-prevention to the tenderfoot and the novice who have yet to learn its necessity, and yet the annual toll of life and valuable timber takes place as inevitably as the collection of taxes.

It is estimated that ninety per cent of forest fires are due to nothing more or less than the carelessness of the summer camper. If reasonable care were exercised by everyone who enjoys a camping holiday, nine out of every ten fires would never get a start at all, and there would be a saving to Canada of tens of thousands of valuable timber to say nothing of the great unnecessary human sacrifice.

Considered from an economic point of view it is ruinous to many trades when the timber is burned throughout whole districts. Sawmills cannot be built in such places, big game do not breed midst blackened stumps. The lumber industry means \$350,000,000 a year to Canada, pulp and paper industry represents \$190,000,000. Trapping turns over \$20,000,000 annually, while tourist trade is estimated at \$200,000,000 a year and is increasing as

DISTRICT MANAGER WANTED

A Canadian life insurance Company, established 56 years having low rates and paying good profits, desires to get in touch with a man in the district of Macleod who is well and favorably known in his community, who has an extensive acquaintance, and who would be interested in building up the business of this Company in his territory on a basis which, with the liberal contract we are prepared to offer, would return to him a very good income, increasing from year to year.

We shall be pleased to receive an inquiry (which will be treated in strict confidence) from a sincere man who is a hard worker, but who need not necessarily be experienced in the life insurance business. With such a man we are prepared to deal on a liberal basis.

Apply:—

time goes along. Here is a boys and girls love the wild grand total of wealth to the creatures of the woodland Dominion representing the therefore appeal to their sense huge sum of \$760,000,000 per of fair play and give the game annum, every cent of which a chance to feed and thrive and depends directly on our forests breed by preserving their home. Teach the family to love Nature and never to kill want- only or needlessly. Fire de- stroys the range for cattle and burns the food for birds and beasts. Fruit trees are ruined when fire runs through the country; in a word, be lovers of the woods and give the saplings of today a chance to be the saw-logs of tomorrow.

Parents should teach their children the sacred duties of Canadian citizenship and see that no careless child with matches can run loose in the woods, for a match may destroy a million trees, while a tree will make a million matches. Do not start little bonfires for fun and thoughtlessly go off leaving embers still warm. Teach the camping groups that every big fire was once a little one, therefore kill the fire while young. Most Blk. Edmonton.

GRANUM LOCAL NEWS

Mr. A. McGregor was a Calgary visitor last week.

Born—To Mr. and Mrs. Walter Marsh, Wednesday, July 30th, a daughter.

Mrs. J. Ellis expects to leave this week for a short visit at Lake Louise and Banff.

The Lawries had Mr. and Mrs. Fred Shouldice and family of Calgary, for visitors Sunday.

Mrs. N. H. Yorgason and daughter returned home Thursday from the Macleod hospital.

Mrs. Arlt and family returned home from their holidays at Creston and Banff last Saturday.

Mr. and Mrs. M. T. Clark, of Brantford, Ontario, have been visitors of the McDougalls for a few days.

Miss Jorgine Moe, attended the lawn party at the Narkaus home in honor of Miss Susan Narkaus, Friday night.

Mr. and Mrs. Aiken and son are spending their holidays at the Geo. Fletcher home. Mr. Aiken is employed in Calgary.

Mr. and Mrs. C. F. Carswell and family left Monday for Red Deer to attend the wedding of Miss Katherine Pyke and Mr. R. F. Rubra.

Mr. and Mrs. C. Anderson and children and Mr. Andrew Moe motored to Waterton Lakes Saturday, returning on Sunday night.

Miss Helen Sandgathe, who has been spending the past two weeks in Calgary visiting with her sister, Wilda, returned home Monday evening.

Mrs. C. F. Carswell entertained at her lovely home Thursday afternoon of last week in honor of her sister Miss Katherine Pyke, of Red Deer.

Mr. and Mrs. James Stover and Mrs. T. Narkaus and daughter Maxine left early Saturday morning for Pendleton, Ore., to attend the funeral of Mr. Embysk.

Miss Agnes Alsard is home this week on her holidays from Calgary. Miss Alsard and her brother and sisters went to Waterton Lakes Wednesday, returning Sunday.

Mr. and Mrs. E. Embysk and daughter received the sad news of the death of Mr. Embysk, his father in Pendleton, Ore., Friday. They left immediately by car for Oregon.

Mr. and Mrs. C. G. Marsh returned Tuesday night from a holiday trip spent at Currie, Minnesota. They were accompanied home by their daughter and her husband—Mr. and Mrs. Ross Thornton.

Mr. E. W. Noel, who has spent twenty-five years in South India, will give a Missionary address illustrated with lantern slides in Reynolds's Hall, Tuesday, August 5th, at 8 p. m. The public are cordially invited to attend.

Guests at the home of Mr. and Mrs. A. L. Easton this week include Mr. Easton's mother, Mrs. Robert Easton, from Drumheller, Alta., and his sister and her husband, Mr. and Mrs. C. M. Graham and their twin daughters, from Lacombe.

Little Ruth Rowe, daughter of Rev. and Mrs. Rowe, sustained a severe cut and had her jaw broken Monday evening when some dogs that were fighting got under the swing throwing her to the ground. She was taken to a Calgary hospital for treatment.

At Starland Theater Friday and Saturday this week Gary Cooper, Walter Huston, Richard Arlen and Mary Brian in "The Virginian"—All talking—like an all talking "Covered Wagon." A classic of the screen. Don't miss this premier sound picture. Also Talking Comedy. Usual Admission.

A very pretty wedding of much local interest occurred at Medicine Hat when Miss Beatrice Katherine Marsh, daughter of Mr. and Mrs. J. H. Marsh, was united in marriage with Hibby Reynolds, son of Mr. and Mrs. John Reynolds. The ceremony was performed by Rev. Cann, pastor of Fifth Avenue United Church. The bride was gown in a flat silk crepe dress of coral shade. Following the ceremony a buffet luncheon was served at the home of Mr. and Mrs. J. H.

Ellis, which was beautifully decorated with ferns and gladiolus for the occasion. The newly married couple returned to Granum on Monday evening.

A treat is in store for the play-going public of Granum when Starland Theater will offer "The Show of Shows" on Monday night, August 4th. All talking, singing and dancing. In gorgeous technicolor. The picture of 150 stars—introducing many new song hits and dance numbers. Two complete shows—first show commences at 7 p. m. Second at 9 p. m. Usual Admission.

A large meeting of the shareholders of The Public Petroleum Corporation, Granum, Ltd., was held in Reynolds's hall on Thursday evening. All matters pertaining to the company's business and gone into fully. It was very gratifying to the shareholders when it was shown from the financial statement of the Corporation that the net profits for the first three-months period of operation was \$4,372.02. The paid up capital is \$7085.00. It was agreed to secure further shareholders, and on account of the creditable showing made by the Company it is expected that a large number of tractor users that are not now in the Company will obtain shares that they may participate in the Patronage Dividends. The Red Head Petroleum Products Company are giving entire satisfaction and a vote of appreciation was tendered to the Directors for the able manner in which they have conducted the affairs of the Corporation. Upon vote of the shareholders it was decided to postpone the paying of dividends until October 15th. The Directors

of the organization are: R. A. Macleod, President; W. C. Sherman, Secretary; A. MacGregor, C. Little, R. F. Smith and Geo. A. MacKenzie.

WHEN JOHNNIE WON'T EAT

When little Johnnie pushes away his dinner plate, turns his head and emphatically registers his protest against food. Mother grows gray with worry and anxiety. Sometimes she may cajole, often she will scold and in rare cases she will spank the said little John in her endeavour to bring him to reason. Often everything fails, and John is the winner. For just such mothers there is an excellent article by Dr. Ira Wile in Hygeia. The doctor believes that a child's eating habits are the result of his home training, good or bad. He says there are various reasons for Johnnie's refusal. For example, he maybe overtired and in that condition of exhaustion he cannot respond to food. A rest would conduce to an appetite, and small children need much rest between meals. Another cause is one of psychological origin, when Johnnie refuses because he loves the enjoyment of his meal. Too much attention is often fatal, and frequently the child receives an overdose of instruction in table manners which turns him away from the enjoyment of his meal. The niceties of eating and the use of utensils, the ability to manage without spilling is really a matter of time, and as the child grows older, so he unconsciously acquires the habits of good breeding from the grown-ups at the family board.

Dr. Wile suggests that Johnnie should be allowed to miss a meal or two if he wants

to, he should also be completely ignored when he appears in a negative state of mind, and on no account must he see the over solicitude of his parents. It is a cardinal rule, never to show by look, word, or gesture, the slightest concern as to whether he eats or not. It is well to place smaller portions of food on the plate before the tired looking child, and all emotional distress must be avoided. For health literature on children, send to the Red Cross, 407 Civic Bldg. Edmonton.

WOOL DEMAND STRENGTHENS

While it is a little early in the season as yet to forecast prices for the 1930 wool clip, the Dominion Live Stock Branch reports that wool prices have sagged consistently to lower levels since January 1, and present price indications are that local buyers will be offering around eight to ten cents per pound for ungraded wools. With prevailing price levels mill buyers show an inclination to operate on a more extensive scale and a larger volume of wool appears to be moving into the mills than for several months past. The 1930 clip of Canadian graded wools will not be available in any large quantities until the latter part of May or early in June, and it is not possible as yet to indicate what prices will be paid for these.

CONTROL OF CURRANT RUST

Four applications of sulphur dust at intervals of ten to fourteen days commencing when the leaves are about one-half inch in diameter has been found by the Division of Botany of the Dominion Department of Agriculture to be very effective in the control of white-pine blister rust on black currants. This method was developed through three of field experimentation. It was found that the rust came from white pines to the currant bushes appearing on the black currant leaves when a definite stage of development in the aeciospores on the white pine became apparent. While this treatment prevents defoliation of the currant bushes it is also found that there is sufficient inoculum left on the leaves to re-infect white pines.

PLANT IMPORTS INCREASE

Canada's appreciation for the aesthetic in parks, garden and amateur horticulture is reflected in the amazing increase which is reported in the importations of trees, shrubs, roots, perennials and bulbs. In 1919 the Plant Inspection Service of the Dominion Department of Agriculture examined 900,000 plants, etc., at ports of entry while in 1929 the number examined was over 48,000,000. Inspection stations are maintained at Halifax, St. John, Quebec City, Montreal, Ottawa, Toronto, Niagara Falls, Windsor, Winnipeg, Estevan and Vancouver, where imported plants are examined to ensure freedom from insect pests and plant diseases.

PICK OUT THE BEST

One of the finest opportunities offered grain growers and farmers of Canada, or any other country, is the World's Grain Exhibition and Conference being held in Regina in 1932. L. H. Newman, Dominion Cerealists of the Department of Agriculture, at Ottawa, has announced that the growing test for purity of variety will determine prize awards. The grain shown in 1932 must be grown in 1931, and 1930 is the last year in which selection of seed stock can be safely made. Watch your crop this year—pick out the best—and while growing grain next year to show in 1932 make your own growing test.

MORE AND BETTER

The larger the hen the better the eggs she lays and the more there are of them. Poultry experts of the Dominion Department of Agriculture find that body weight has a very direct relation to egg production. A three pound hen will average 137.9 eggs a year, weighing 23 ounces to the dozen. With each 1/4 pound increase in weight there is an increase in the number of eggs laid and their weight per dozen—a four and a half pound hen will lay an average of 206.6 eggs a year weighing 24.5 ounces to the dozen. This item should be of particular interest to farmers keeping poultry flocks.

FUTURE SEEMS ASSURED

Superintendent Taggart of the Dominion Experimental Station at Swift Current, Sask., in his report, just issued, observes that in the open plain regions of Western Canada the future of the combine seems assured. Combine operators who have had fairly extensive experience are almost unanimous in stating that they expect to continue using the combine. At the same time, he points out that changes and modifications both in machines and cropping practices will probably be made.

A pessimist thinks fire insurance an extravagance because he doesn't have a fire; the optimist buys insurance cheerfully, for he knows he's going to have a fire.

If hanging is done to scare those inclined to evil, is there any insinuation in the choice of newspapermen as witnesses?

You think the land has gone wholly effeminate, and then you reflect happily that no body yet serves whipped cream on hot dogs.

"Suggestive" plays do little harm. Those innocent enough to be contaminated are too dumb to get the naughty inference.

Miniature putting is all right, but what we want is a game where you sock the ball every time and walk only six feet.

Ripley's "Believe It or Not" has pictured almost every queer thing except the head used as a model for straw hats.

A great financier is one who can "explain" a decline of stocks and use enough big words to conceal his ignorance.

The way to judge a city's virtue by the number of arrests for drunkenness is to discover its definition of "drunk."

A second term is the one during which an official does the things he refrained from doing in order to get it.

All change seems queer, and no doubt the boys up a tree guffawed at the first man who got bald on the back.

Alas! The only one that doesn't give honorary degrees is the school of experience.

You can say one thing for King Carol. He didn't pretend to have lost his memory.

Electricity and Alberta's Progress

Spanning mountains, valleys, forests, farm lands, ranges, rivers, creeks and swamps—from all parts of the province—the electric power transmission lines of this company cover over 2000 miles.

These power lines carry electrical energy from several large generating stations to 132 cities, towns and villages, lighting streets, homes, stores and offices—and lightening labor in hundreds of different ways.

Wherever it goes, this flow of electricity increases wealth, encourages industry, speeds progress, provides comforts, reduces drudgery and hardship.

BLUEBERRIES

are at their best now and are arriving in fine condition, considering that they come all the way from Ontario. The price is quite reasonable.

BLACKBERRIES

will be available all through August, and you will want lots of these as the high price of Raspberries has curtailed canning, and the Blackberries will be a dollar a case cheaper.

THE WHITE HALL

Macleod Local and Personal News

Alex McDonald, of Calgary, formerly of the John Deere Coy. at Macleod, recently paid a short visit here meeting old friends and taking in the Elks carnival.

Miss Rose Killoran, who has been teaching for a number of years at the Waterton School, a short visit here meeting old friends and taking in the Elks carnival.

Miss Marion Reid is the guest of Mr. and Mrs. A. T. Leather at their cottage at Waterton Lakes National Park.

Miss Fleming, of Cayley, was a visitor in Macleod over the week-end a guest at the home of Mr. and Mrs. R. McCrea.

Miss Patterson has resigned as teacher of grade VII on the staff of Macleod Public School. A successor has not yet been appointed.

Mr. and Mrs. T. B. Armstrong and family returned to Macleod on Monday morning from their holiday trip to Saskatchewan.

Mr. and Mrs. W. H. McNab, Misses Bertha and Helen McNab, Connie Reid and Edith Arner spent the past week at Waterton National Park.

Mr. and Mrs. Kenneth Kennedy and Pat, of Los Angeles, California, spent a few days in Macleod last week the guests of Mr. and Mrs. W. J. Ryan. Mr. Kennedy is a cousin of Mrs. Ryan.

Mrs. J. Swinerton, Miss Margaret Swinerton, Mrs. James Young, Miss Dorothy Young and Mrs. R. M. Reid left on Tuesday for a week's holiday at Waterton Lakes National Park.

Word has been received that Edna Russell has been successful in passing her Junior Piano examination with Honours. Miss Edna is a pupil of Mrs. Donald White, A. T. C. M., I. M. S.

Mrs. S. R. Mallett, of Calgary, spent the week-end in Macleod, visiting her husband who is at present in Macleod superintending the laying of Second Avenue with the Bitumal Composition.

Ray Baker was the only nominee on Monday for the mayor of the Macleod Town Council, caused by the resignation of W. O. Hoodless. Mr. Baker will fill out Mr. Hoodless' unexpired term till February 1932.

Miss Irene Young returned on Saturday from Medicine Hat, where she had been the guest for two weeks of Miss Ruth Panter, formerly of Macleod. Miss Panter returned with Miss Young for a short holiday in Macleod.

Dr. and Mrs. J. M. Armstrong, of the United Church, Coronation, are visitors in Macleod this week, the guests of Mr. and Mrs. J. L. Fawcett. Dr. Armstrong was for a number of years pastor of the Methodist church in Macleod, and left six years ago for Coronation, where he is still pastor of the church in that town. Since leaving Macleod Mr. Armstrong has been honored by having the Degree of Doctor of Divinity conferred upon him. Dr. and Mrs. Armstrong are enjoying their holiday in Macleod and their many friends in the church and

Mrs. J. Swinerton, Miss Margaret Swinerton, Mrs. James Young, Miss Dorothy Young and Mrs. R. M. Reid left on Tuesday for a week's holiday at Waterton Lakes National Park.

Word has been received that Edna Russell has been successful in passing her Junior Piano examination with Honours. Miss Edna is a pupil of Mrs. Donald White, A. T. C. M., I. M. S.

Mrs. S. R. Mallett, of Calgary, spent the week-end in Macleod, visiting her husband who is at present in Macleod superintending the laying of Second Avenue with the Bitumal Composition.

Ray Baker was the only nominee on Monday for the mayor of the Macleod Town Council, caused by the resignation of W. O. Hoodless. Mr. Baker will fill out Mr. Hoodless' unexpired term till February 1932.

Miss Irene Young returned on Saturday from Medicine Hat, where she had been the guest for two weeks of Miss Ruth Panter, formerly of Macleod. Miss Panter returned with Miss Young for a short holiday in Macleod.

Dr. and Mrs. J. M. Armstrong, of the United Church, Coronation, are visitors in Macleod this week, the guests of Mr. and Mrs. J. L. Fawcett. Dr. Armstrong was for a number of years pastor of the Methodist church in Macleod, and left six years ago for Coronation, where he is still pastor of the church in that town. Since leaving Macleod Mr. Armstrong has been honored by having the Degree of Doctor of Divinity conferred upon him. Dr. and Mrs. Armstrong are enjoying their holiday in Macleod and their many friends in the church and

outside the church are delighted to meet them and welcome them back to Macleod.

Mr. and Mrs. Linnings and their two children, of Cadogan, Alberta, arrived in Macleod last week-end for a two weeks holiday at the home of Mrs. Linnings' parents, Mr. and Mrs. Robert McCrea. Mr. Linnings states that crops in the Cadogan district were extra good this year until a recent hail storm destroyed about 85% of the wheat. He says they were dried out last year and hailed out this year.

THE WEST IS PLANTING MORE SWEET CLOVER

From the Dominion Seed Branch comes one of the most interesting reports of field crop developments in 1930, which is that the prairie provinces are sowing very much larger quantities of sweet clover seed this year than ever before. The Branch reports indicate a definite trend in the direction of increasing the proportion of forage crops through out the West, and the beet sugar manufacturers are distributing sweet clover seed to beet growers for the purpose of maintaining and improving beet production. Saskatchewan is calling for larger quantities of sweet clover seed, which will probably be supplied from Eastern Canada, and Manitoba is also increasing the area of sweet clover seeded. As a crop sweet clover costs less to produce than some of the other legumes, it is a practically sure crop, it has very high fertilizer value, and it can be introduced into a system of grain farming with particular ease. These are all factors which contribute to its growing popularity as a crop.

ORNAMENTAL SHRUBS

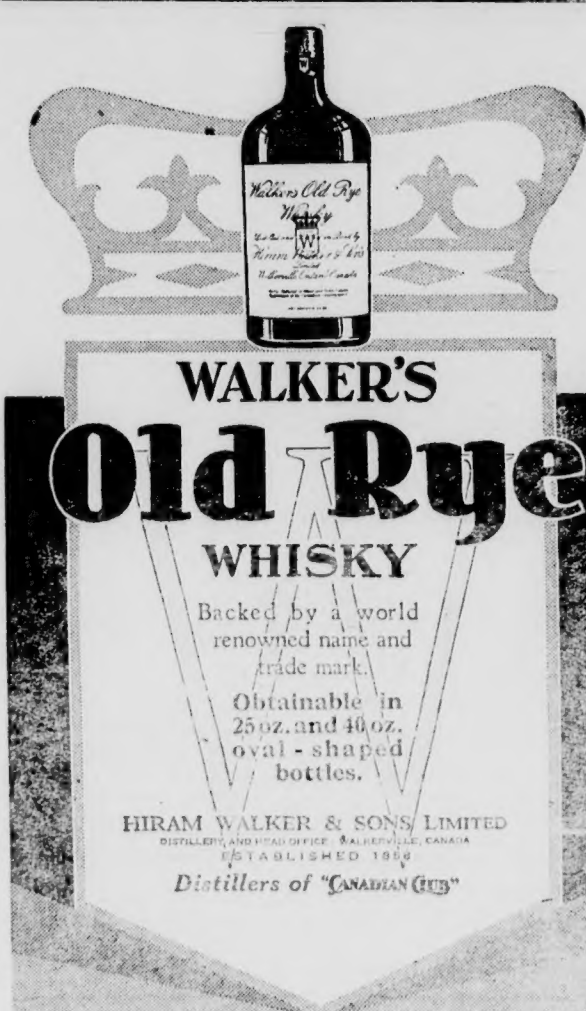

Not the least important of the work being done by the Experimental Farms and Stations of the Dominion Department of Agriculture is the development of types of ornamental trees and shrubs and hardy perennials, annuals, and garden powers suitable for use in all parts of Canada. Many of these have been found suited to even the most difficult climatic conditions, and the report of the Experimental Farm or Station nearest you will provide an indication of varieties adapted to use in your locality.

One advantage in starting late is that you miss the thousands who start early to avoid the crowd.

The first question to decide is whether a pension represents damages or charity or gratitude.

The French idea is that if Dante lived now he could find the devil a lot nearer home.

This 10-Foot Tractor Binder

Does Twice the Work of An 8-Foot Horse-Drawn Binder

Suppose a storm was coming up and you were hurrying as fast as you could to finish cutting your grain. If you could suddenly transform your 8-ft. horse-drawn binder into a machine that would cut twice the width, wouldn't it be a wonderful help? Why not have this kind of a machine to start with and cut in two the number of days required to harvest your crop? The McCormick-Deering 10-ft. tractor binder will cut twice as much grain in a day as an 8-ft. binder because it receives the power for operating the cutting and binding mechanism from the tractor through the power take-off. The man who drives the tractor can operate the binder without extra help under ordinary conditions thus releasing the man usually required on the binder for other duties.

Hot weather does not reduce the efficiency of this outfit. You can cut grain from daylight until dark without stopping. You can put a man on the outfit during the noon hour. The machine travels at a faster forward speed than a horse-drawn binder but you can reduce the forward speed and still operate the cutting mechanism of the machine at normal speed when grain is down and tangled. If the binder should clog you can stop the tractor and still operate the cutting mechanism on the binder until the machine clears itself. Thirty-five to forty acres a day is an ordinary day's cutting. If you operate more hours, of course, you can increase this capacity.

If you are going to need a new binder this year, it will be worth while to consider the McCormick-Deering tractor binder because of the great amount of time and labor it saves. Come in and let us tell you about it.
